Complete building services solutions

Base Services Group — Setting
the Standard for ICA Excellence

VIC / QLD / NSW / NT / SA / TAS / NZ

Who we are

We are a team of ICA (independent commissioning agents), building services engineers, and commissioning managers with 30 years of expertise in successfully completing projects involving intricate construction, accreditation, engineering, and commissioning hurdles.

Our team's deep understanding of each construction and engineering discipline enables us to optimise the commissioning process, eliminate risk, and guide you through the project and protect your best interests. With our expertise in successfully completing some of the most intricate projects, BASE is well-equipped to handle the complexities of modern developments.

Our Sectors

- Residential
- Commercial
- Retail
- Build to Rent
- Education
- Health
- Infrastructure
- Data Centres
- Defense
- Correctional
- Government

“The value BASE brings to projects is straight-forward. We cut through ambiguity by focussing efforts on the right sequence of challenges. We solve critical problems by driving systematic pathways, maximising efficiencies and enabling all works to be completed with certainty.”

Adam Gangi, Managing Director

Our Point of Difference

Our diverse team, comprising GreenStar Accredited Professionals, ICAs, services engineers, and project managers, brings extensive expertise and experience spanning design, commissioning, and project management for Tier 1 projects throughout Australia.

INDEPENDENT COMMISSIONING AGENT

Our ICAs ensure projects meet the highest standards of quality, functionality, and performance through independent commissioning support, system verification, issue resolution, and assistance in achieving green building certifications.

SERVICES ENGINEERS

Our services engineers optimise your project's functionality and performance by conducting thorough design reviews, collaborating with stakeholders, providing expert advice on efficiency and compliance, and developing comprehensive commissioning plans.

COMMISSIONING MANAGERS

Our experienced commissioning managers oversee the entire commissioning process, coordinating with all stakeholders, ensuring smooth project delivery, and verifying that all systems and equipment are installed, tested, and operating in accordance with design intent and client requirements.

BASE has developed our own "ICA Process", a streamlined and systematic approach that sets us apart in the industry. This process optimises project workflows, document handling, and acceptance procedures, providing our clients with a confident in achieving project efficiency, excellence, and risk mitigation through our transparent practices, comprehensive tracking tools, and attention to detail.

Our Clients

“ The team at BASE provide exceptional customer service as they place their clients’ needs above anything else, ensuring their requests are actioned in a timely and efficient manner. Their relationships with key stakeholders in the industry have been extremely beneficial in achieving successful outcomes from complex and difficult situations. ”

What We Do

INDEPENDENT COMMISSIONING AGENTS

We work with building owners and developers to provide independent commissioning advice and assistance in accordance with all relevant industry standards.

- GreenStar Accreditation
- Commissioning Verification
- Sustainability Implementation
- Building Tuning Client Representative

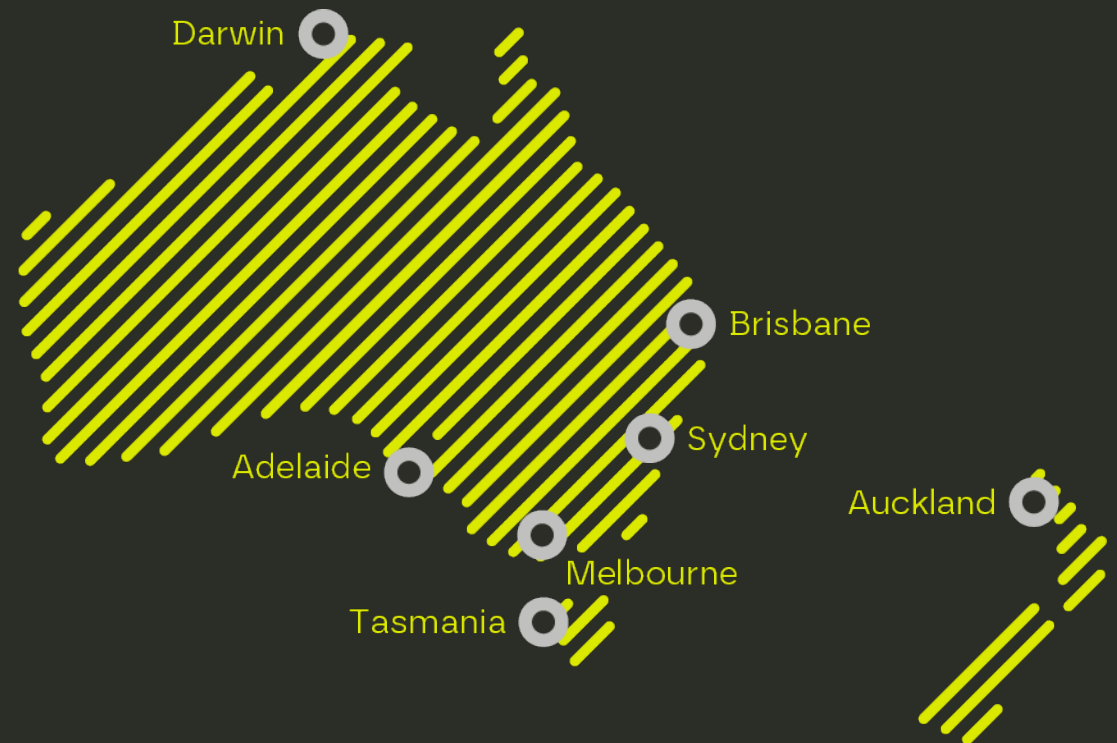

SPECIALISED COMMISSIONING MANAGEMENT

We facilitate detailed and strategic approaches to services coordination, delivery and commissioning management. We implement effective procedures to achieve best outcomes for projects.

- Buildability Management
- Accreditation Management
- Services Management
- Engineering Management
- Commissioning Management
- Delivery Oversight
- Systems Integration
- Operational Upgrades

Our National Presence

Independent Commissioning Agents – ICA

ACCREDITATION SUPPORT

ICA simplifies the accreditation process for building owners by providing expert guidance and support throughout the building lifecycle. Our team ensures compliance with standards, conducts thorough reviews and inspections, collaborates with stakeholders, prepares application packages, and provides ongoing support. By partnering with ICA, owners and developers can navigate the accreditation process with confidence, achieving the highest levels of compliance, quality, and performance while minimizing risk and delays.

BUILDING CERTIFICATION

We comprehensively collaborate with various authorities and governing bodies to ensure successful building certification.

SUSTAINABILITY CERTIFICATION

We facilitate ESD initiatives in design, construction and operation to achieve the targeted NABERS, Green Star, WELL, and LEED ratings while improving energy efficiency, operating costs, and market value.

COMMISSIONING CERTIFICATION

We ensure compliance with design specifications and standards through extensive reviews, advice, and verification for optimal building performance.

BUILDING TUNING CLIENT REPRESENTATIVE

We monitor, tune, and validate building services systems on behalf of building owners for a minimum of 12 months after occupation. Our building tuning services ensure that buildings operate optimally as per the specifications and Green Star or NABERS requirements.

Key ICA Deliverables & Accreditations

- Service Reviews
- Maintainability Reviews
- Commissioning Plans
- Documentation Review
- Process & Progress Reviews
- Witness Testing Matrices
- Installation Verification
- Efficiency Review
- Data Validation
- Commissioning Reports
- Witness Testing
- Operational Verification
- Building Tuning
- Soft Landings

COMMERCIAL

TOGA

SURRY HILLS VILLAGE & WICKS PARK

Mixed-use precinct with four residential buildings, one commercial building, one hotel and an existing heritage building.

“ Adam’s strategic thinking and South East Water contacts resulted in a sewer diversion agreement that netted M&L significant additional ground floor retail space. While South East water were initially reluctant to consider the basement diversion, Adam’s focussed approach and reasoned argument resulted in an outstanding outcome for the development.

”

Specialised Commissioning Management – SCM

HEAD CONTRACTOR SUPPORT

The commissioning of building service systems is complex and requires a focused and strategic approach at each construction phase: from design through to delivery. We mitigate risk and deliver optimally performing and efficient buildings to owners and managers.

BUILDABILITY MANAGEMENT

We assist project management teams by providing extensive design reviews and expert buildability analyses. We have programming and value management experience to guide service-related activities towards performance.

SERVICES MANAGEMENT

We apply a holistic approach to integrate a buildings' services inclusive of electrical, mechanical, hydraulics, fire, lifts, AV, security, ICT, converged networks, and building twins.

ACCREDITATION MANAGEMENT

Our trusted relationships within government and governing bodies allows us to achieve accreditations swiftly and efficiently. We save project teams time and cost.

COMMISSIONING MANAGEMENT

We create, compile, review, and manage key elements of commissioning documentation for continual project success. Our strategic methodology delivers successful commissioning and project handover.

ENGINEERING MANAGEMENT

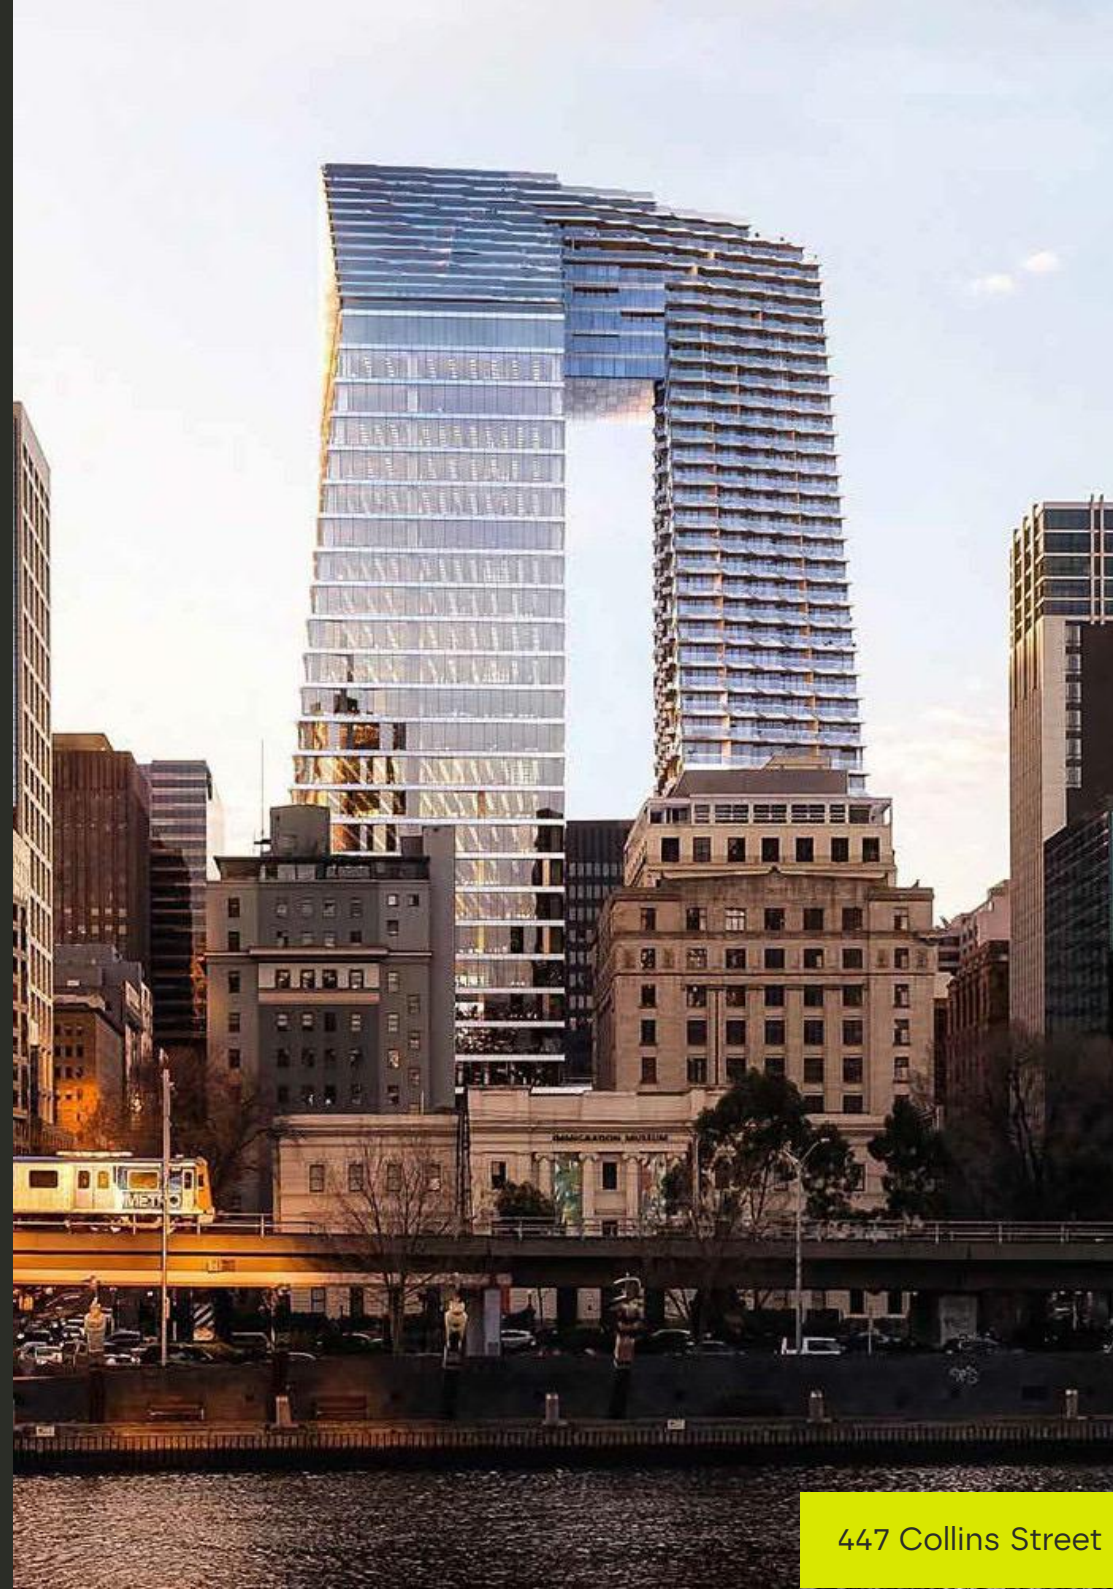

BASE delivers top-tier commissioning and engineering outcomes for backbone infrastructure. We collaborate with trusted engineering firms, offer extensive oversight on all engineering service disciplines, add value to BIM, and pride ourselves on our proactive approach to project management.

“

BASE's expertise has enabled the successful delivery of a range of our major projects over many years. They have a proactive approach and have proven their capabilities in services management on three of our landmark development projects: 700 Bourke Street for the NAB Head Office, 720 Bourke Street for Medibank, and now on 447 Collins Street whereby the team finalised commissioning and building tuning to enable a unified handover.
